Open Access Macedonian Journal of Medical Sciences

Reviewer C:

Thanks for sending me to review that manuscript that has assessed the

**Determinants analysis Factors Affecting the Capability of Family Health Care of Chronic Kidney Disease with hemodialysis.** the data is useful.

1. The sampling method should be explained in detail.
2. Explain how to estimate the sample size.
3. Validity and reliability of the questionnaire should be mentioned
4. More details about the questionnaire should be mentioned. (Dimensions, number of questions, etc.)
5. The limitations of the research should be mentioned.
6. the manuscript was poorly written. The written language has many grammatical and typo errors, making it difficult to follow with manuscript. Therefore, I recommend revising the manuscript by a native English speaker

Recommendation: Revisions Required
